

A Distribution-Free Test for Structure in Machine Vision

Roger Kratz

November 3, 2025

Delta versus k plots were produced from `per_k_summary_from_downloads.csv` generated from `g_test_outputs.npz`; see [1] for methods; raw permutation and bootstrap arrays (`delta_perms`, `delta_boots`, `delta_obs`) are archived in the repository.

The reproducibility snapshot and code for Appendix E are archived on Zenodo (DOI: 10.5281/zenodo.17517439).
